

Linked Data and Wikidata

JACKIE SHIEH

PRATT COURSE 653

DEC 2, 2021

Your answer

- ▶ As a ... <your role>
- ▶ How do you define linked data?
- ▶ What do you expect from linked open data?

Topics

- Linked data
 - History, semantics, syntax, serializations
 - URIs vs dereferenceable URIs
- Library community's LOD projects
 - IFLA LRM, RDA/RDF, BIBFRAME
 - BIBFRAME Implementations (Sinopia (PCC Libraries), Share-VDE, Sweden, Hungary)
 - Thesauri, vocabularies, ontologies (FAST, VIAF, authority files (LoC, DNB's GND), MeSH, Getty vocabularies)
- Linked open data platform
 - Wikidata

Linked Data

Rationales

- ▶ Why Linked data
- ▶ What is Resource Description Framework (RDF)
- ▶ What is a Uniform Resource Identifier (URI)
- ▶ What is a dereferenceable (RDF) URI
- ▶ What skills will be needed

►Why Linked data

Four Linked data principles

- ▶ Use URIs for names for THINGS
- ▶ Use HTTP URIs for lookup
- ▶ Use open standards (e.g. RDF) in non-proprietary formats
- ▶ Include links to other URIs

► What is Resource Description Framework (RDF)

RDF applications

►What is a Uniform Resource Identifier (URI)

A **Uniform Resource Identifier (URI)** is a **string** of characters that unambiguously identifies a particular **resource**. To guarantee **uniformity**, all URIs follow a predefined set of syntax rules,^[1] but also maintain **extensibility** through a separately defined **hierarchical naming scheme** (e.g. `http://`).

`scheme:[//authority(DNS)]path[?query][#fragment]`

Types	Example
URN	<code>urn:isbn:0-476-27557-4</code>
URL	<code>https://www.pratt.edu</code>

► What is a dereferenceable URI

use Web protocols to retrieve a representation of the resource the URI identifies

Scheme/Protocol	Description
ftp	File Transfer Protocol
http/https	Hyper text transfer protocol (Secure)
mailto	Electronic mail address
ssh	Secure shell
tel	telephone
urn	Uniform Resource Names

Not all URLs are equal

RDF serializations

- ▶ RDF/XML
- ▶ RDFa
- ▶ JSON-LD (JavaScript Object Notation
Linked Data)
- ▶ N3 (Notation 3)
- ▶ TTL (*Turtle, Terse RDF Triple Language*)

► Knowledge and skills

- ▶ Record- to entity-based descriptive data
- ▶ Fundamentals of RDF and Linked data
- ▶ Management of identities and linking among them
- ▶ Ability to design, maintain, publish, and map RDF vocabularies and application profiles
- ▶ Ability to create, transform and interact with RDF data
- ▶ Ability to generate linked data applications

► Exercise: RDF URLs vs URLs

Q210126

American astrophysicist and the 5th Secretary of the Smithsonian

https://en.wikipedia.org/wiki/Charles_Greeley_Abbot:

Charles Greeley Abbot (May 31, 1872 – December 17, 1973) was an American astrophysicist and the fifth secretary of the Smithsonian Institution, serving from 1928 until 1944. Abbot went from being director of the Smithsonian Astrophysical Observatory, to becoming Assistant Secretary, and then Secretary of the Smithsonian Institution over the course of his career. As an astrophysicist, he researched the solar constant, research that led him to invent the solar cooker, solar boiler, solar still, and other patented solar energy inventions.

description: The scene, painted by George Catlin at a Comanche village in 1834, shows "the wigwam of the Chief, his dogs, and his five children." The artist also described the village as "six or eight hundred skin-covered lodges, made of poles and buffalo skins, in the manner precisely as those of the Sioux and other Missouri tribes . . . This village with its thousands of wild inmates, with horses and dogs, and wild sports and domestic occupations, presents a most curious scene; and the manners and looks of the people, a rich subject for the brush and the pen." COVID19

The [COVID-19 pandemic](#) is an ongoing pandemic of coronavirus disease 2019 (COVID-19), caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). The outbreak was first found in Wuhan, China, in December 2019, and was called a pandemic by the World Health Organization (WHO) on 11 March 2020. COVIWD (COVID-19 Wikidata Dashboard) provides a one-stop information/visualization service for COVID-19-related topics. The live data for this dashboard comes from [Wikidata](#), a free but quality, collaborative knowledge graph. The information presented here in this dashboard is not to be considered medical advice and is not intended to replace consultation with a qualified medical professional. A paper (in English) describing the data & query model and development of COVIWD is available at [this link](#). For any feedback, please feel free to contact [Fariz Darari](#).

“The worth and importance of the Institution is not to be estimated by what it accumulates within the walls of its building, but by what it **sends forth** to the world.”

—Joseph Henry, 1852

First Secretary of the Smithsonian Institution (1846-1878)
