- Wiki platform overview
- Smithsonian Wikimedia projects
- Wikidata & Wikibase
- Libraries Wikidata projects
- SI Wikibase pilot

Wiki platform

Wiki: What is it?

- Wiki – a collaborative platform for writing and publishing via a user agent, e.g., browser
- Wikipedia – a collaboratively edited, multilingual, free Internet encyclopedia supported by the non-profit Wikimedia Foundation
- ***Wikidata*** – a global database (*repository*), hosting structured data in triples
- ***Triple statement*** – "this" "is" "that" (subject item (Q#))—property (P#)—object item (Q#))
- ***Wikibase*** – a software that drives Wikidata, which supports structured data
- ***Data modeling*** – analyze data requirements to support logic, structure, discoverability, context, etc.

Wikimedia family

Wikidata “QuickStatements”

Tool to edit Wikidata items, based on a simple set of text commands, V1 or CSV.

The screenshot shows the QuickStatements interface with three main windows:

- Main Window:** Displays a "CREATE" command for creating a Wikidata item. The command includes fields for LAST, Len, Den, P31, P21, P569, P19, P20, P6379, and P1795, along with their corresponding values and descriptions.
- New Batch Window:** A modal window titled "This is a new interface for creating command batches." It contains fields for "batch number", "user name", and "temp. batch ID". Buttons for "New batch", "Import V1 commands", and "Import CSV" are also present.
- Import CSV Window:** A modal window titled "Create new command batch for SI Wikibase as batch name". It displays a list of commands imported from a CSV file, including statements about Louis Pasteur, Nicolaus Copernicus, André-Marie Ampère, Alessandro Volta, Aristotle, and Isaac Newton.

The URL quickstatements.toolforge.org/#/ is visible at the bottom of the main window.

information from the Smithsonian American Art Museum catalog

description: The scene, painted by George Catlin at a Comanche village in 1834, shows "the wigwam of the Chief, his dogs, and his five children." The artist also described the village as "six or eight hundred skin-covered lodges, made of poles and buffalo skins, in the manner precisely as those of the Sioux and other Missouri tribes . . . This village with its thousands of wild inmates, with horses and dogs, and wild sports and domestic occupations, presents a most curious scene; and the manners and looks of the people, a rich subject for the brush and the pen." (Catlin, Letters and Notes, vol. 2, no. 42, 1841, reprint 1973, and 1848 Catalogue, Catlin's Indian Gallery, SAAM online exhibition)

Program for Cooperative Cataloging

Programs of the PCC: BIBCO CONSER NACO SACO

The Program for Cooperative Cataloging (PCC) seeks to be a democratic and diverse organization whose mission and goals are determined by its membership. Members govern the programs through participation in program events, standing committees, and task groups. PCC is a cooperative cataloging venture wherein members contribute bibliographic records and related data under a common set of standards and conventions using the bibliographic utilities.

The mission of the PCC

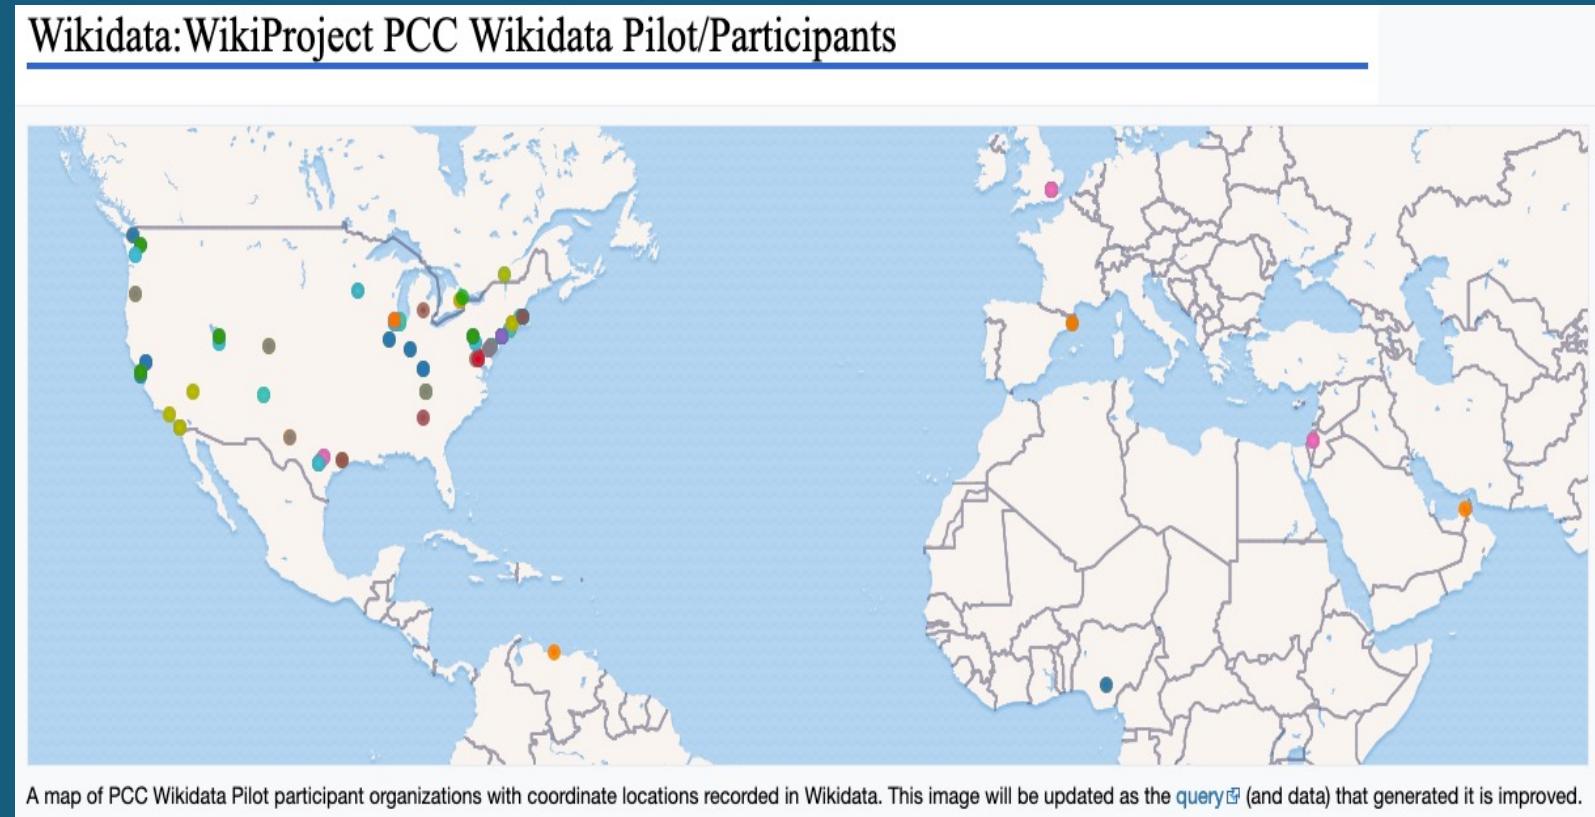

MISSION

The PCC promotes the discovery and use of the world's knowledge by supporting metadata producers in library and other cultural heritage communities and by forging alliances with partners who share common goals. PCC members create trusted metadata and support its use and reuse by global communities.

PCC Wikidata pilot

Wikidata, a high-demand identifier hub, ideal for identity management of a NACO-Lite approach

How did we get started?

- Authority control needs
- Data starting point
 - Artists files—Libraries and museums
 - Languages and scripts for non-Latin collections
 - Researchers and published outputs

Libraries' Wiki efforts

Wikibase: an SI-centric Wikidata

- What are the entity descriptions that will matter ?
- How much should be said about them?

Where do we start?

Where do we stop?

Should there be different treatments for opinions and interpretation?

What form should the description take?

Who will do the work?

oclc.org/research/presentations/2019/111319-godby-NISO-what-are-entities-that-matter.html

Wikibase benefits

- Independent of, with a federation option to, Wikidata
- Technology stack, potential viable for developing linked data store
- Ability to develop specialized data model
- Local control over data (determining which claims to remain private),
but at the cost of inter-relatability?
- Documentation: best practices
- System customization, e.g., Wikidata:Schemas in place of <property—constraint>
wikidata.org/wiki/Wikidata:WikiProject_Schemas

Welcome to the Smithsonian's Wikibase Pilot!

This instance is for getting us comfortable in the Wikibase environment, and to start modeling out how to implement a Wikibase for Smithsonian data.

Consult the [User's Guide](#) for information on using the wiki software.

Looking to search Properties? Try [Special:Search](#) and choose Advanced. Then you can select to search properties, items, discussion, or anything else listed.

Linked data resources in Libraries' PRISM

Smithsonian Libraries and Archives

Home Services and Guides Collections and Search Records Management About Us Contact Us

Wikimedia and Linked Data

The [Descriptive Data Management](#) and the [Resource Description](#) departments of SLA provide expertise to the Smithsonian Community on Linked Open data, Wikimedia Commons, Wikipedia, Wikidata and Wikimedia Projects Training.

Contact

[Wikimedia and Linked Data inquiries](#)

Wikimedia Project Services

SLA has staff members who provide the following services:

- Training for groups and individuals in editing [Wikipedia](#) and other [Wikimedia Foundation](#) projects (such as [Wikidata](#) and [Wikimedia Commons](#)) for Smithsonian staff, interns, fellows, volunteers and affiliates
- Presentations on creating and improving Wiki content in your unit's area of subject expertise
- Assisting in your unit's educational and public outreach efforts through [Wikimedia Foundation](#) projects
- Acting as a liaison with Wikipedians locally and worldwide who are working on [GLAM \[Galleries, Libraries, Archives & Museums\]](#) projects and are eager to be of help by designing tools or serving on short or long-term volunteer assignments in collaboration with your unit.

Linked Open Data Services

Structured data that links to another data point

- Person data
- Research data
- Description data
- Data modeling
- Bibframe
- How linked data impacts web results and visibility
- Consultation for data models and designs
- Data may include person data, collection data, metadata
- Controlled vocabulary or thesauri consultations for cultural heritage collections
- Consultations for Wikimedia projects, e.g. Wikipedia, [Wikimedia Commons](#) (audio, video, images), etc.

“The worth and importance of the Institution is not to be estimated by what it accumulates within the walls of its building, but by what it **sends forth** to the world.”

—Joseph Henry, 1852

First Secretary of the Smithsonian Institution
(1846-1878)
