

# Linked Data and Wikidata

PRATT COURSE 653

DEC 2, 2021

<http://bit.ly/Pratt653LOD202112>

JACKIE SHIEH

# Your answer

- ▶ As a ... <your role>
- ▶ How do you define linked data?
- ▶ What do you expect from linked open data?

# Topics

- Linked data
  - History, semantics, syntax, serializations
  - URIs vs dereferenceable URIs
- Library community's LOD projects
  - IFLA LRM, RDA/RDF, BIBFRAME
  - BIBFRAME Implementations (Sinopia (PCC Libraries), Share-VDE, Sweden, Hungary)
  - Thesauri, vocabularies, ontologies (FAST, VIAF, authority files (LoC, DNB's GND), MeSH, Getty vocabularies)
- Linked open data platform
  - Wikidata

# Linked Data

# Rationales

- ▶ Why Linked data
- ▶ What is Resource Description Framework (RDF)
- ▶ What is a Uniform Resource Identifier (URI)
- ▶ What is a dereferenceable (RDF) URI
- ▶ What skills will be needed

# ►Why Linked data

# Linked data principles

- ▶ Use URIs for names for THINGS
- ▶ Use HTTP URIs for lookup
- ▶ Use open standards (e.g. RDF) in non-proprietary formats
- ▶ Include links to other URIs

<http://w3.org/DesignIssues/LinkedData.html>

# ► What is Resource Description Framework (RDF)

# RDF applications

# ►What is a Uniform Resource Identifier (URI)

A **Uniform Resource Identifier (URI)** is a **string** of characters that unambiguously **identifies** a particular **resource**. To guarantee uniformity, all URIs follow a predefined set of syntax rules,<sup>[1]</sup> but also maintain **extensibility** through a separately defined **hierarchical naming scheme** (e.g. <http://>).

scheme:[//authority(DNS)]path[?query][#fragment]

Types	Example
URN	<b>urn:isbn:0-476-27557-4</b>
URL	<b>https://www.pratt.edu</b>

# ► What is a dereferenceable URI

use Web protocols to retrieve a representation of the resource the URI identifies

Scheme / Protocol	Description
ftp	File Transfer Protocol
http/https	Hyper text transfer protocol (Secure)
mailto	Electronic mail address
ssh	Secure shell
tel	telephone
urn	Uniform Resource Names

# Not all URLs are equal

3XX: Request  
will complete  
after further  
action

301 (Redirect)  
303 (See other)

2XX: Request  
successfully  
received,  
understood and  
accepted

# RDF **serializations**

- ▶ RDF/XML
- ▶ RDFa
- ▶ JSON-LD (JavaScript Object Notation  
Linked Data)
- ▶ N3 (Notation 3)
- ▶ TTL (*Turtle, Terse RDF Triple Language*)

# ► Exercise: RDF URLs vs URLs

# ► Knowledge and skills

- ▶ Record- (cataloging) to entity-based (modelling) descriptive data
- ▶ Fundamentals of RDF and Linked data
- ▶ Management of identities and linking among them
- ▶ Ability to design, maintain, publish, and map RDF vocabularies and application profiles
- ▶ Ability to create, transform and interact with RDF data
- ▶ Ability to generate linked data applications

## ► Your answer...

- Are you enthusiastic about the change?
- What is the RDF data model and components?
- Are you comfortable with the principles of things with URI?
- Can you shed light on a URI pointing to a thing and one pointing to a page about the thing?

## Charles Greeley Abbot

Q210126

American astrophysicist and the 5th Secretary of the Smithsonian

[https://en.wikipedia.org/wiki/Charles\\_Greeley\\_Abbot](https://en.wikipedia.org/wiki/Charles_Greeley_Abbot):

**Charles Greeley Abbot** (May 31, 1872 – December 17, 1973) was an American astrophysicist and the fifth secretary of the Smithsonian Institution, serving from 1928 until 1944. Abbot went from being director of the Smithsonian Astrophysical Observatory, to becoming Assistant Secretary, and then Secretary of the Smithsonian Institution over the course of his career. As an astrophysicist, he researched the solar constant, research that led him to invent the solar cooker, solar boiler, solar still, and other patented solar energy inventions.

### information from the Smithsonian American Art Museum catalog

**description:** The scene, painted by George Catlin at a Comanche village in 1834, shows "the wigwam of the Chief, his dogs, and his five children." The artist also described the village as "six or eight hundred skin-covered lodges, made of poles and buffalo skins, in the manner precisely as those of the Sioux and other Missouri tribes . . . This village with its thousands of wild inmates, with horses and dogs, and wild sports and domestic occupations, presents a most curious scene; and the manners and looks of the people, a rich subject for the brush and the pen." (Catlin, Letters and Notes, vol. 2, no. 42, 1841, reprint 1973, and 1848 Catalogue, Catlin's Indian Gallery, SAAM online exhibition)
