

Library Linked Data

PRATT INFO-653

Knowledge Organization

NOV 29, 2022

JACKIE SHIEH

Your answer ...

- ▶ As a <your role> ...
- ▶ How do you define linked data?
- ▶ What do you expect from linked open data?

Topics

- Linked data
 - History, semantics, syntax, serializations
 - URIs vs dereferenceable URIs
- Library community's LOD projects
 - IFLA LRM, RDA/RDF (Official RDA), BIBFRAME
 - BIBFRAME Implementations (Sinopia (PCC Libraries), Share-VDE, Sweden, Hungary)
 - Thesauri, vocabularies, ontologies (FAST, VIAF, authority files (LoC, DNB's GND), MeSH, Getty vocabularies)
- Linked open data platform
 - Wikidata

Linked Data

Things to consider

- ▶ What is Linked data and why?
- ▶ What is Resource Description Framework (RDF)?
- ▶ What is a Uniform Resource Identifier (URI)?
- ▶ What is a dereferenceable (RDF) URI?
- ▶ What skills will be needed?

Why Linked data

Linked data describes a method of publishing structured data so that it can be interlinked and become more useful.

The Semantic Web isn't just about putting data on the web. It is about making links, so that a person or machine can explore the web of data. With linked data, when you have some of it, you can find other, related, data.

- A roadmap to the Semantic Web by Tim Berners-Lee

Linked data principles

- ▶ Use URIs for names for THINGS
- ▶ Use HTTP URIs for lookup
- ▶ Use open standards (e.g. RDF) in non-proprietary formats
- ▶ Include links to other URIs

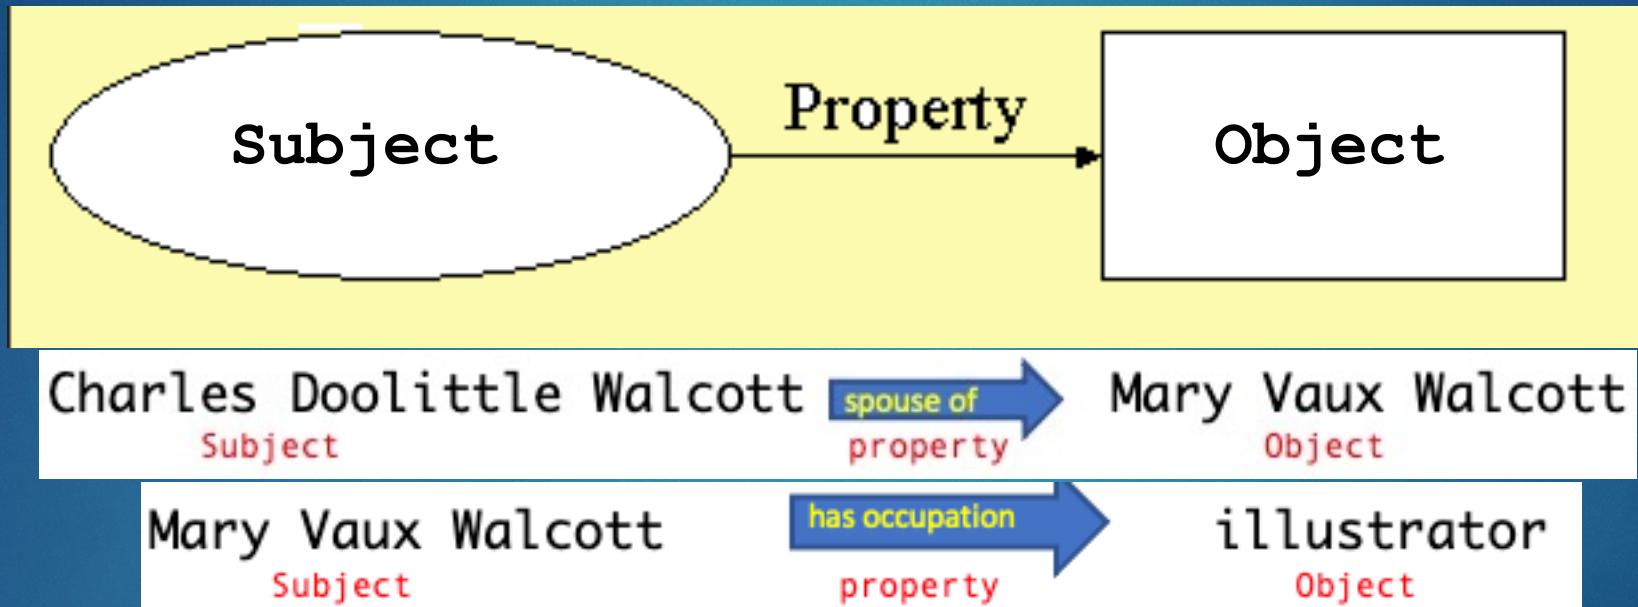

<http://w3.org/DesignIssues/LinkedData.html>

First things first

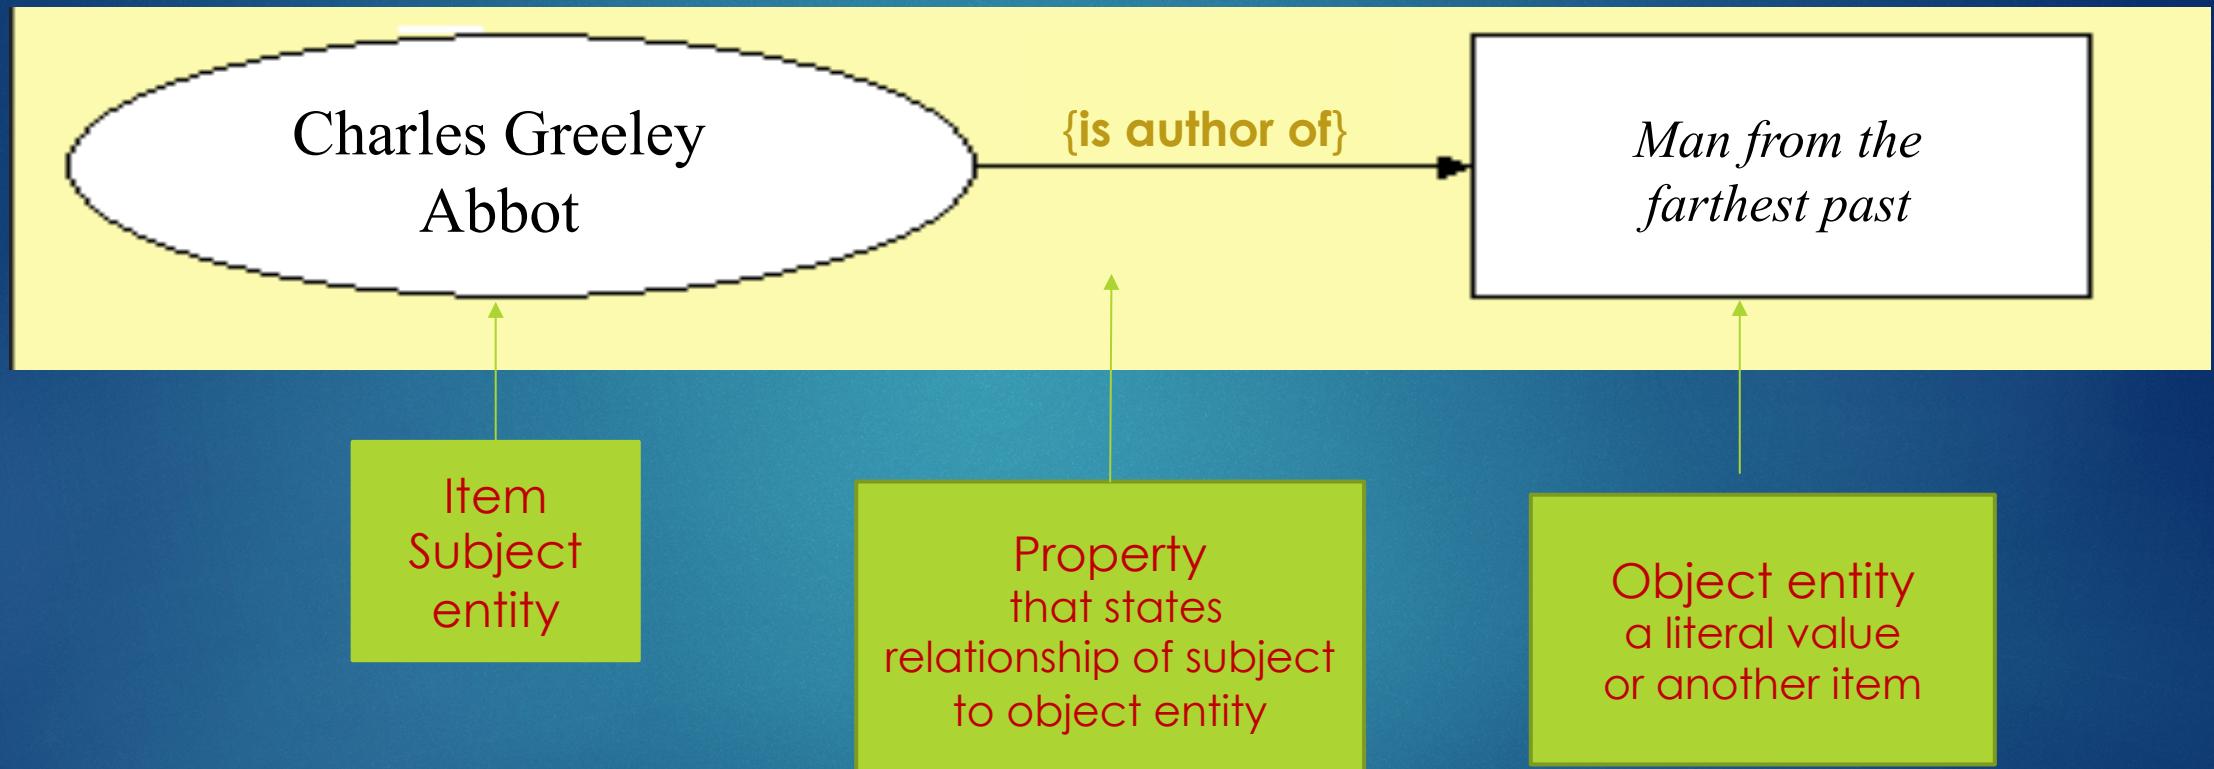

8

Resource Description Framework (RDF)

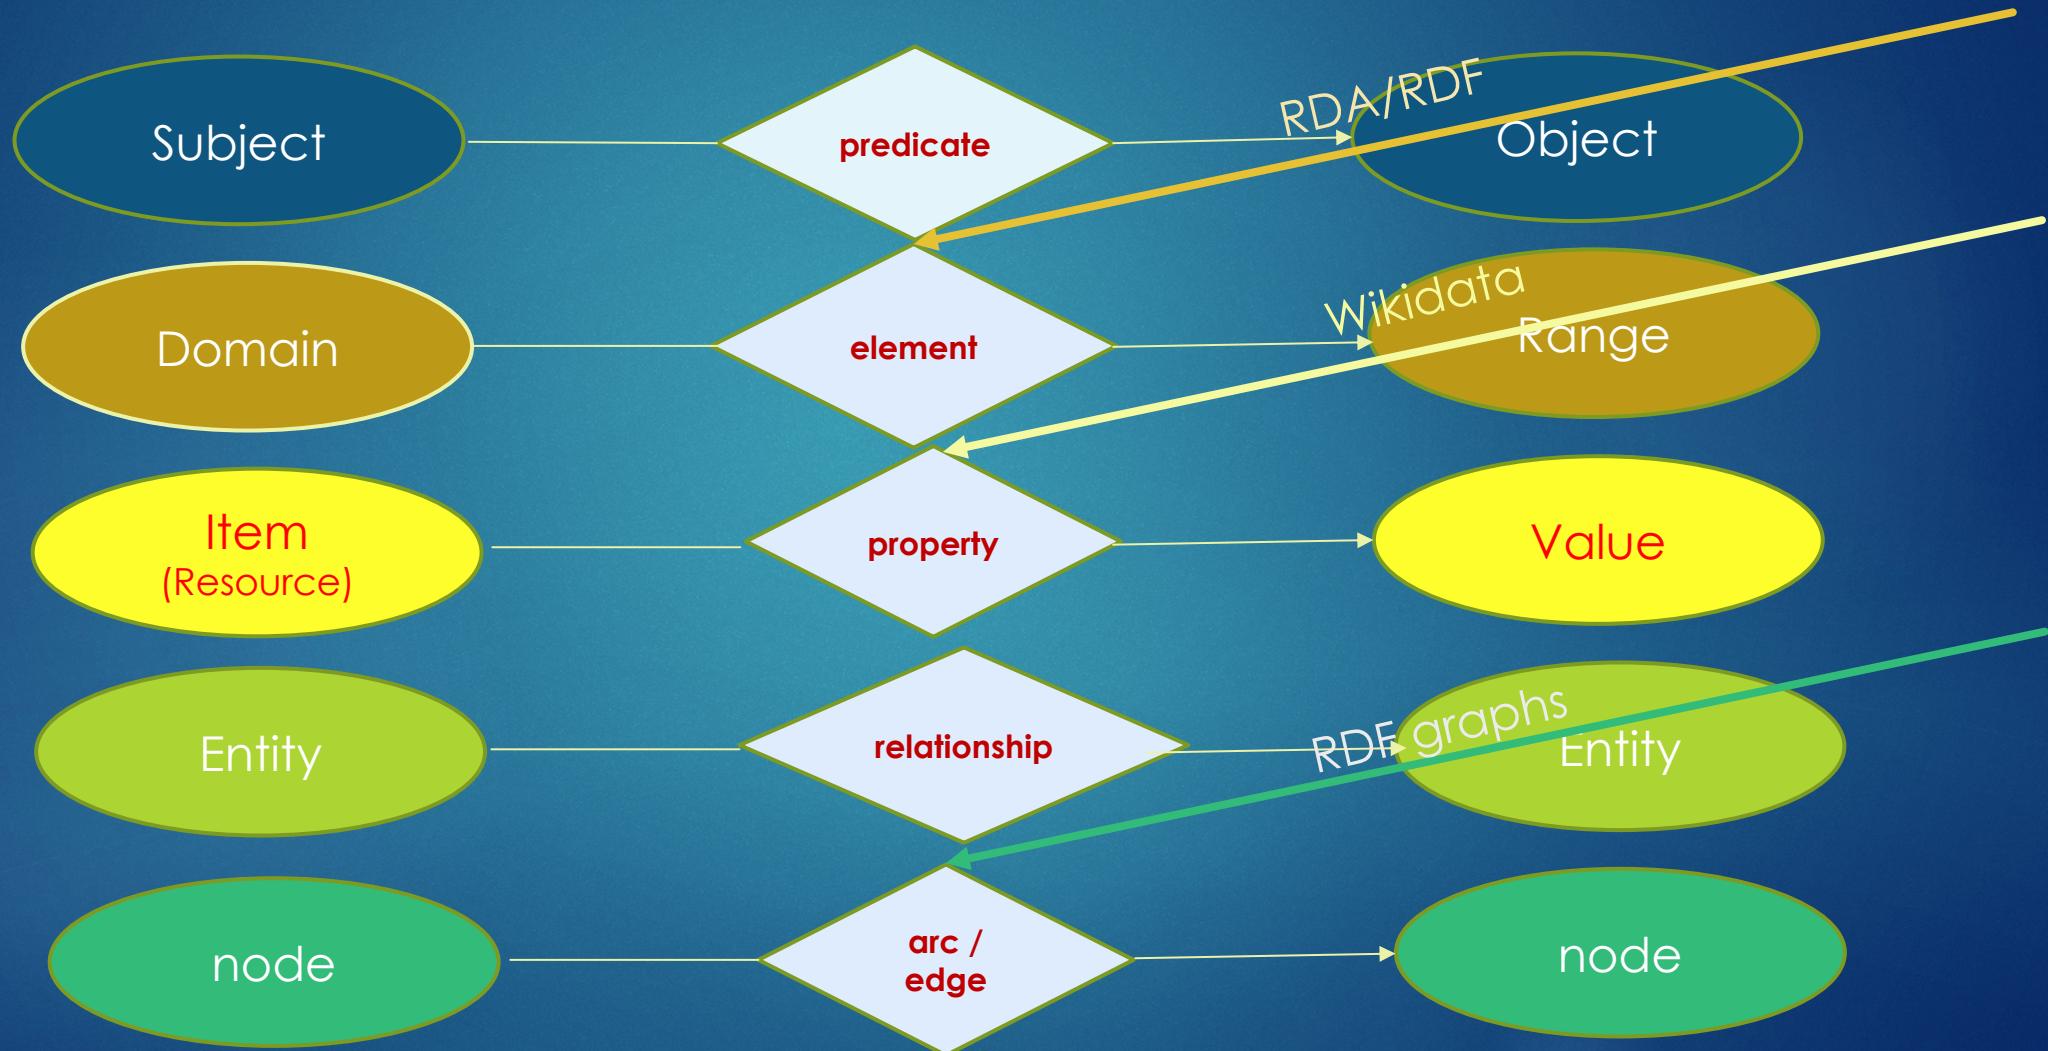

An entity statement

RDF applications

RDF applications

What is a Uniform Resource Identifier (URI)

A **Uniform Resource Identifier (URI)** is a **string** of characters that unambiguously **identifies** a particular **resource**. To guarantee **uniformity**, all URIs follow a predefined set of syntax rules,^[1] but also maintain **extensibility** through a separately defined **hierarchical naming scheme** (e.g. <http://>).

scheme:[//authority(DNS)]path[?query][#fragment]

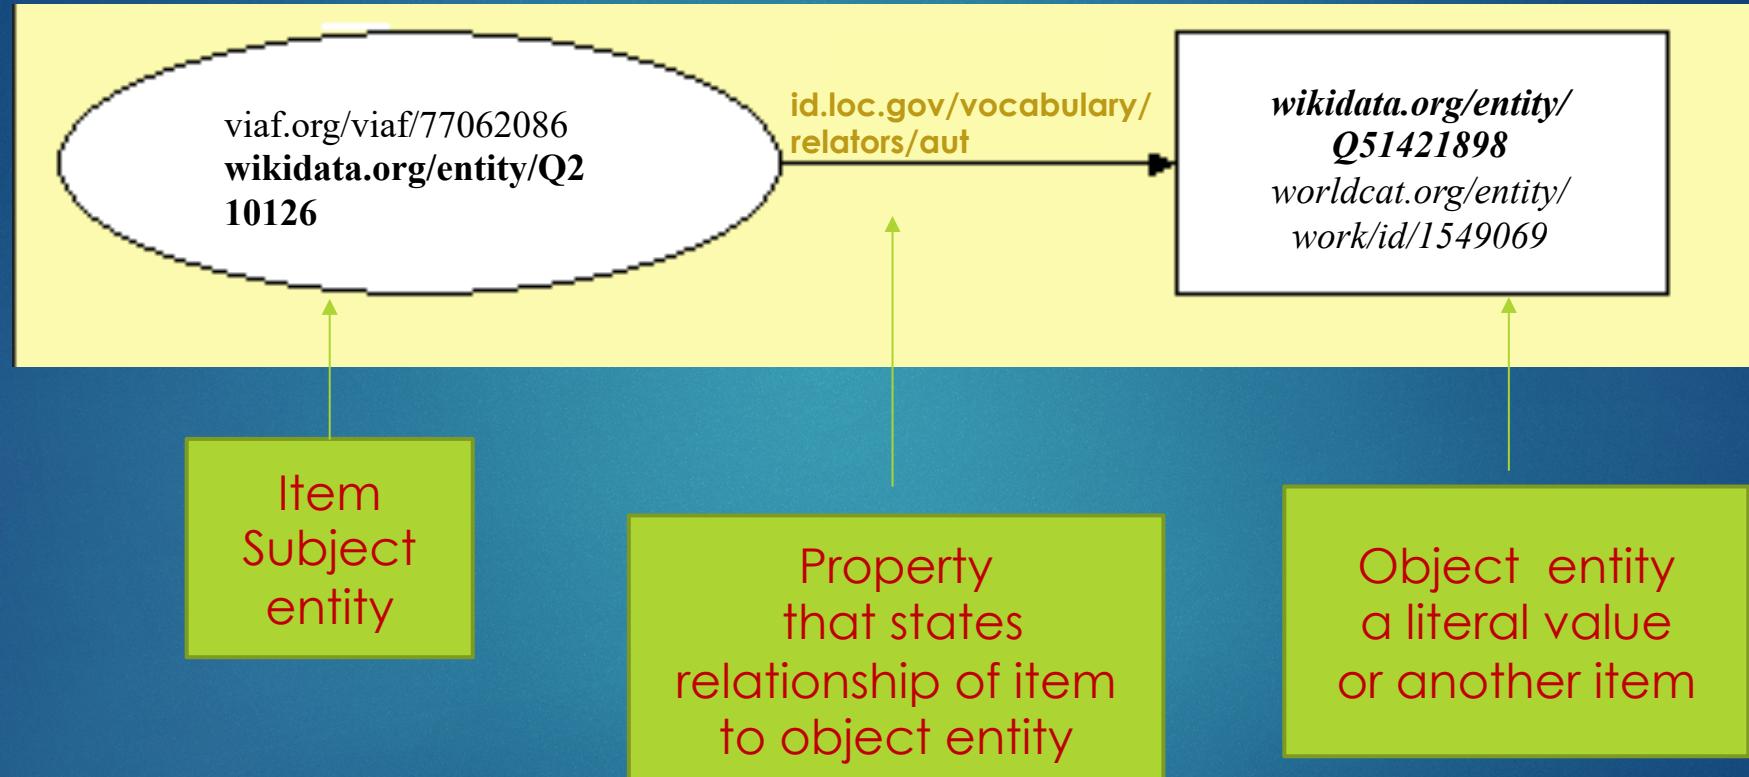

Types	Example
URN	urn:isbn:0-476-27557-4
URL	https://www.pratt.edu

Dereferenceable URI

Use Web protocols to retrieve a representation of the resource the URL identifies

Scheme/Protocol	Description
ftp	File Transfer Protocol
http/https	Hyper text transfer protocol (Secure)
mailto	Electronic mail address
ssh	Secure shell
tel	telephone
urn	Uniform Resource Names

URI replacing label

Not all URIs are equal

3XX: Request
will complete
after further
action

301 (Redirect)
303 (See other)

2XX: Request

received,
understood and
accepted

RDF serializations

- ▶ RDF/XML
- ▶ RDFa
- ▶ JSON-LD (JavaScript Object Notation
Linked Data)
- ▶ N3 (Notation 3)
- ▶ TTL (*Turtle, Terse RDF Triple Language*)

► Exercise: RDF URLs vs URLs

Knowledge and skills

- ▶ Record- (cataloging) to entity-based (modelling) descriptive data
- ▶ Fundamentals of RDF and Linked data
- ▶ Management of identities and linking among them
- ▶ Ability to design, maintain, publish, and map RDF vocabularies and application profiles
- ▶ Ability to create, transform and interact with RDF data
- ▶ Ability to generate linked data applications

► Your answer...

- Are you enthusiastic about the change?
- What is the RDF data model and components?
- Are you comfortable with the principles of things with URI?
- Can you shed light on a URI pointing to a thing and one pointing to a page about the thing?

Cataloging standards
in transition

Entity-Relationship

Library community's efforts

Wiki platform

Common terms

- ▶ **Wiki** – a collaborative platform for writing and publishing via a user agent (e.g., browser)
- ▶ **Wikipedia** – a collaboratively edited, multilingual, free Internet encyclopedia supported by the non-profit Wikimedia Foundation
- ▶ **Wikidata** – a *global database (repository), hosting structured data in triples*
- ▶ **Triple statement** – "this" "is" "that" (subject item (Q#))—property (P#)—object item (Q#))
- ▶ **Wikibase** – a software that powers Wikidata and supports structured data

Common terms (cont.)

- ▶ **Data modeling** – analyze data requirements to support logic, structure, discoverability, context, etc.
- ▶ **Serialization** – flavors of data output formats (e.g., RDF/XML, JSON, TTL, N3, etc.)
- ▶ **Visualization** – visual forms of data representation (e.g., tables, charts, maps, etc.)
- ▶ **Node** – an active, physical device attached to a network, capable of transmitting data

Why Wiki platform?

WHY LINK YOUR LIBRARY DATA WITH WIKIDATA?

- Wikimedia Movement Strategy: “A world in which every single human being can freely share in **the sum of all knowledge**”
- By 2030, Wikimedia will become the essential infrastructure of the ecosystem of free knowledge
- Wikidata already connects many controlled vocabularies, authority files, and ontologies used in the GLAM sector and beyond
- It is multilingual
- Wikidata as a hub to connect data between GLAM institutions

Wikimedia family

Robert Louis Stevenson

From Wikipedia, the free encyclopedia

Robert Louis Balfour Stevenson (13 November 1850 – 3 December 1894) was a Scottish novelist, poet, essayist, and travel writer. His most famous works are *Treasure Island*, *Kidnapped*, *Strange Case of Dr Jekyll and Mr Hyde* and *A Child's Garden of Verses*.

A literary celebrity during his lifetime, Stevenson now ranks among the 26 most translated authors in the world.^[1] His works have been admired by many other writers, including Jorge Luis Borges, Bertolt Brecht, Marcel Proust, Arthur Conan Doyle, Henry James, Cesare Pavese, Ernest Hemingway, Rudyard Kipling, Jack London, Vladimir Nabokov,^[2] J. M. Barrie,^[3] and G. K. Chesterton, who said of him that he "seemed to pick the right word up on the point of his pen, like a man playing spilleskis".^[4]

Works [edit | edit source]

Novels [edit | edit source]

- Treasure Island (1883)
- Prince Otto (1885)

Charles Greeley Abbot

Q210126

American astrophysicist and the 5th Secretary of the Smithsonian

https://en.wikipedia.org/wiki/Charles_Greeley_Abbot:

Charles Greeley Abbot (May 31, 1872 – December 17, 1973) was an American astrophysicist and the fifth secretary of the Smithsonian Institution, serving from 1928 until 1944. Abbot went from being director of the Smithsonian Astrophysical Observatory, to becoming Assistant Secretary, and then Secretary of the Smithsonian Institution over the course of his career. As an astrophysicist, he researched the solar constant, research that led him to invent the solar cooker, solar boiler, solar still, and other patented solar energy inventions.

Label from: English (en)

[view on Wikidata](#) [skip this photo](#) [browse paintings](#)

artist: George Catlin (Q455133)

collection: Smithsonian American Art Museum (Q1192305)

location: Smithsonian American Art Museum (Q1192305)

country of origin: United States of America (Q30)

material used: oil paint (Q296955) canvas (Q4259259)

Smithsonian American Art Museum ID: 4421

information from the Smithsonian American Art Museum catalog

description: The scene, painted by George Catlin at a Comanche village in 1834, shows "the wigwam of the Chief, his dogs, and his five children." The artist also described the village as "six or eight hundred skin-covered lodges, made of poles and buffalo skins, in the manner precisely as those of the Sioux and other Missouri tribes . . . This village with its thousands of wild inmates, with horses and dogs, and wild sports and domestic occupations, presents a most curious scene; and the manners and looks of the people, a rich subject for the brush and the pen." (Catlin, Letters and Notes, vol. 2, no. 42, 1841, reprint 1973, and 1848 Catalogue, Catlin's Indian Gallery, SAAM online exhibition)

COVIWD: COVID-19 WIKIDATA DASHBOARD

COVID19

The [COVID-19 pandemic](#) is an ongoing pandemic of coronavirus disease 2019 (COVID-19), caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). The outbreak was first found in Wuhan, China, in December 2019, and was called a pandemic by the World Health Organization (WHO) on 11 March 2020. COVIWD (COVID-19 Wikidata Dashboard) provides a one-stop information/visualization service for COVID-19-related topics. The live data for this dashboard comes from [Wikidata](#), a free but quality, collaborative knowledge graph. The information presented here in this dashboard is not to be considered medical advice and is not intended to replace consultation with a qualified medical professional. A paper (in English) describing the data & query model and development of COVIWD is available at [this link](#). For any feedback, please feel free to contact [Fariz Darari](#).
